How long is copyrighted material protected?

0

- There are many answers for this question depending on when the work was created and what the purpose was for.
- For works of art that were just created as a means of art and if they were made after January 1, 1978, it will be protected from the moment of creation until 70 years after the author's death.
- For pieces of art that were created for hire, they are protected for 95 years from publication or 120 from creation, whichever is shorter.

How can I get permission to use copyrighted materials?

- First find out who owns the rights so that you can contact the author, owner, or publishing company. You most often need to fill out a form letting the author know your purpose. Some authors require you to ask permission in written form. If you are contacting a publisher, you will need to contact their *permissions department*.

Fair Use Permission to use copyrighted material.

There are four components of Fair Use:

- Purpose
- Nature of Copyrighted Work
- Amount of Work Used
- Market Effect

Fair Use - Purpose

When the use of copyrighted material is used for educational reasons such as: Teaching, Research, Scholarship, Criticism, or Comment. When changes are made to the work to serve a new purpose also referred to as: Transformative or Productive Use.

Fair Use- Nature

• Under the Fair Use analyses, some pieces qualify as relevant, such as if it is fictional or non-fictional. Uses of factual works are more likely to fall within Fair Use. Some works will never qualify for Fair Use, they are: consumables nor standardized tests.

Fair Use- Amount of Work

This component considers the amount of the work that was taken to be used. The less that is taken the more protected one is.

Fair Use- Market Effect

This component protects the creator of the work of art. We does not allow people to copy copyrighted material if the author would lose the opportunity to benefit from it.
